

Affan Naveed

Cloud Infrastructure Engineer

Rahim Yar Khan, Pakistan | affannaveed43@gmail.com | 0307-7555308 | [\[LinkedIn URL\]](#) | [\[GitHub URL\]](#)

TECHNICAL SKILLS

Cloud / AWS: EC2, S3, Lambda, DynamoDB, IAM, CloudWatch, Route 53, VPC, SNS, API Gateway, Aurora, RDS, CloudFront

Frontend: React, Tailwind CSS, HTML5, CSS3

Languages: JavaScript (ES6+)

Tools / DevOps: Git, GitHub Actions, CI/CD, Vercel

PROJECTS

Personal Portfolio Website — github.com/bugfinn/portfolio

- Built and deployed a personal portfolio site with Next.js 15 (App Router) and Tailwind CSS v4, using GitOps-based CI/CD from GitHub to Vercel
- Designed a serverless backend on AWS Lambda using native Function URLs instead of API Gateway, reducing architecture complexity and operating cost
- Modeled DynamoDB data with a Global Secondary Index (GSI) to eliminate full table scans on blog post queries
- Debugged and resolved CORS preflight failures on Lambda Function URLs by implementing a custom OPTIONS handler
- Maintained a disciplined Git workflow using conventional commit prefixes (feat/fix/ux/docs/refactor) throughout development

Counter Mind — Final Year Project — *In Progress*

- Building a 2.5D duel arena game with opponent-adaptive AI across four components: Nash-equilibrium policy, sequence model, exploiter policy, and meta-controller
- Own AWS infrastructure and deployment for the project; stack includes Next.js, Three.js, PyTorch, and Stable-Baselines3

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03) — In Progress

EDUCATION

BS Software Engineering — Khwaja Fareed University of Engineering & Information Technology (KFUEIT)
Expected Graduation: 2027
